

Recommendation Letter for Dr. Luo Yan

To Whom It May Concern,

I am **Professor Zhenhua Xiong**, Professor at the Institute of Robotics, School of Mechanical Engineering, Shanghai Jiao Tong University. It is with great pleasure that I recommend **Dr. Luo Yan** for consideration for a postdoctoral research position.

I have followed Dr. Luo's research trajectory with considerable interest and have been impressed by his **depth of insight, creativity, and scientific maturity**. Dr. Luo exhibits a rare combination of **precise analytical thinking and innovative problem-solving capabilities** that distinguishes him among his peers. His work consistently demonstrates a clear understanding of state-of-the-art methods while also pushing boundaries toward novel research directions.

A particularly noteworthy example of his innovative thinking is his contribution to the **MotionVL** framework, which integrates visual-language perception with reinforcement learning to create a **self-iterative, semantically guided learning paradigm** for autonomous control. This work reflects Dr. Luo's ability to **bridge diverse modalities and learning principles**, producing a research outcome that is both technically rigorous and conceptually forward-looking.

In addition to his technical strengths, Dr. Luo has demonstrated **strong research communication skills** through well-structured academic writing and compelling presentations. He is capable of articulating complex concepts with clarity and precision, which has facilitated productive scholarly exchanges. Moreover, Dr. Luo's systematic approach to experimental validation and his adherence to high standards in documentation and analysis further attest to his readiness for postdoctoral research at distinguished institutions.

Dr. Luo's combination of **rigorous methodology, creative synthesis of ideas, and clear academic communication** positions him as an excellent candidate for postdoctoral study. I have every confidence that he will make impactful contributions to your research community and continue to grow as an innovative scholar.

I recommend Dr. Luo without reservation.

Sincerely,

Professor Zhenhua Xiong
